

### **Make Life Easy – Do a Home Inventory**

Create a home inventory to keep track of your belongings and be better prepared should you experience a fire, burglary or another event. This inventory list helps NAGICO expedite claim settlement and properly compensate your financial loss.

Creating an inventory is fast and simple. Start by making a list of your possessions, describing each item, and noting the date of purchase and cost. Can't recall the date of purchase or cost? No worries, provide an estimated cost/value. Remember to list big-ticket items like jewelry, artwork and collectibles. It is also recommended that you take pictures of these items.

Provide this list and pictures to your NAGICO representative and save it in the cloud for your own personal reference.
